

FILEMAKER PRO 10 ADVANCED ADVANCED DEVELOPMENT AND CUSTOMIZATION TOOLS!

FileMaker® Pro 10 Advanced includes all the features of FileMaker Pro 10 plus a suite of advanced development and customization tools to help you design and develop more powerful and more customized database applications!

Get all these features that are new to both FileMaker Pro 10 and FileMaker Pro 10 Advanced

- **New!** Status Toolbar - Put commonly used features at your fingertips with the redesigned interface. Plus customize the toolbar with features you use the most.
- **New!** Script Triggers - Create and run scripts prompted by user actions for increased productivity.
- **New!** Dynamic Reports - Make changes to grouped data on the fly for easier customization.
- **New!** Saved Finds - Save your favorite find requests and then perform them in a single click for quicker searches.
- **New!** Send Mail via SMTP - Send email directly through an SMTP server for faster direct distribution; no email client needed.
- **New!** Themes and Templates - Choose from 30 updated Starter Solutions and 10 new themes to help build beautiful databases with ease.

Design and develop databases faster and easier

Customize your database application even more by renaming, adding, or deleting menu and toolbar items with Custom Menus. Create standalone, runtime applications that don't require users to have FileMaker Pro.

Debug and troubleshoot more efficiently

Pinpoint problem areas by reviewing scripts step-by-step in the Script Debugger. Monitor fields, variables, expressions, and even test calculation formulas with the Data Viewer, as well as temporarily disable script steps to test portions of your scripts.

Modify and maintain with ease

Update databases faster by importing multiple tables or by using copy/paste to move fields, tables, scripts, and script steps. Get comprehensive information on database schema and options, like fields, web viewers, layouts, Custom Menus, and more with the Database Design Report.

Custom Menus

Get more control over the icons in the new Status Toolbar with Custom Menus. Choose which icons you want displayed and add or change the text associated with each one.

Script Debugger

Get more visibility into the new Script Triggers with the Script Debugger. You'll be able to easily keep track of exactly what scripts are being triggered with each event.

Database Design Report

Run reports on how all the new features in FileMaker Pro 10 - including Script Triggers, Send Mail via SMTP, and Dynamic Reports - are being used with the Database Design Report.

Minimum Requirements

Windows XP Professional,

Home Edition (Service Pack 3)†

Pentium III 700MHz or higher; 256 MB of RAM; CD drive; SVGA (1024 x 768) or higher resolution video adapter and display

Windows Vista Ultimate,

Business, Home (Service Pack 1)†

800 MHz 32-bit (x86) or higher; 512 MB of RAM; SVGA (1024 x 768) or higher resolution video adapter and display; CD drive

Mac OS X 10.4.11†

PowerPC G4 or G5 or Intel-based Mac - 256 MB of RAM; CD drive

Mac OS X 10.5†

PowerPC G4 (867MHz+), Power PC G5, Intel-based Mac - 512 MB of RAM; CD drive

For All Platforms

Networking: TCP/IP; limited to nine simultaneous FileMaker client connections; each client requires a licensed copy of the software

Instant Web Publishing: A host computer with continuous access to the internet or intranet via TCP/IP; access to the internet requires an internet service provider; FileMaker, Inc. does not provide an internet account for you; limited to five simultaneous web sessions

† Version stated is the minimal requirement. The software may also work with later versions certified by FileMaker.

Volume License Purchase Options

FileMaker provides extensive and progressive volume licensing programs that makes it easy for businesses to outfit their workgroups at a reasonable price. To learn more about FileMaker Volume Licensing Programs, contact the FileMaker Volume Licensing Team at: (800) 725-2747.

The Top Features in FileMaker Pro 10 Advanced

If you're using FileMaker Pro, you'll appreciate all the great benefits of FileMaker Pro 10 Advanced.

- **Custom Menus** - Customize menus by executing your scripts, renaming, adding, or deleting menu items or replacing entire menus with your custom choices for a completely customized solution.
- **Multiple Table Import** – Build or modify databases faster by importing multiple tables at once.
- **Script Debugger** – Pinpoint problem areas in scripts and Script Triggers.
- **Data Viewer** – Monitor fields, variables and calculations while troubleshooting.
- **Runtime Maker** – Create standalone runtime solutions that don't require FileMaker Pro.
- **Kiosk Maker** – Build applications where all menus are hidden.
- **Custom Functions** – Build your own functions and reuse them anywhere in the database file where they were created.
- **External Function Plug-in API** – Build more robust calculations and extend database capabilities.
- **Database Design Report** – Run comprehensive reports on all elements of the database schema.

Pinpoint problem areas as you step through scripts in the Script Debugger.

Keep an eye on current field values, variables, or expressions with the Data Viewer.
